DETAILED ACTION

1. Claims 1-9, 11-17, 20-21 and 23-25 are allowable. The restriction requirement between species, as set forth in the Office action mailed on 12/15/2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim. Claims 18, 19 and 22, directed to nonelected species is no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.** In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Therefore, as stated above, claims 18, 19 and 22 are no longer withdrawn from consideration and claims 1-9 and 11-25 will be examined as followed.

Allowable Subject Matter

2. Claims 1-9 and 11-25 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claims 1-9 and 11-25 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, **“(B) a beamsplitter/coupler comprising a transmissive region intersecting said optical axis and transmitting the real image of said direct view display device to said eye-position, wherein said beamsplitter/coupler further comprises a reflective region; (C) a virtual display device producing a virtual image, wherein said virtual display device is positioned to reflect on said reflective region of said beamsplitter/coupler to produce a reflected image from said virtual image to said eye-position; (D) an edge matching device blending said real image to said reflected image in a smooth and continuous scene as seen at said eye-position; and wherein said beamsplitter/coupler and said edge matching device are configured to present an abutted or an overlapped view of said real image and said virtual image to said eye-position”**. The closest prior art Jachimowicz (5,821,911) discloses combining virtual images and real images, however singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to RICARDO L. OSORIO whose telephone number is (571) 272-7676. The examiner can normally be reached on MONDAY-THURSDAY 7:00 am-5:30 PM.
